DETAILED ACTION

This Office Action is in response to the Request for Continued Examination filed on June 18, 2009. Applicants' arguments, filed June 18, 2009, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office Action.

Response to Election/Restrictions

Applicant's election without traverse of Group (claims 27-28 and 33-49), myocardial infarct and fumaric acid dimethyl ester of formula (I) ester in the reply filed on May 09, 2008 has previously been acknowledged and is maintained.

Claims 27-28, 33-49, 67, 70-73 and 84 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Previously presented claims 27, 28, 33, 35, 36 and 42-49 have been amended to no longer read on the elected species and are withdrawn along with newly submitted claims 67, 70-73 and 84. Election was made **without** traverse in the reply filed on May 09, 2008.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* **v.** *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 65-66, 68-69 and 74-83 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pye et al. (Am J Physiol Heart Circ Physiol, Vol. 284, 7 Nov 2002, pp.

Art Unit: 1612

919-926) in view of Joshi et al. (WO 02/055067, US 2004/0054001 is used as the English equivalent).

Pye et al. disclose treatment of patients during myocardial infarction with NF-kappaB inhibitors, which was shown to decrease the amount of reperfusion injury (p. 925, column 2, lines 41-44). Pye et al. differs from the instant claims insofar as it does not disclose the use of fumaric acid derivatives.

Joshi et al. disclose the use of fumaric acid derivatives as NF-kappaB inhibitors and the treatment of diseases influenced by NF-kappaB (Abstract). Joshi et al. further disclose the fumaric acid derivative, fumaric acid diethyl ester (paragraph [0020]), used in the preparation of a pharmaceutical composition in an amount of 1 to 500 mg (paragraph [0021]); wherein the composition is administered orally and in the form of micro-tablets with an enteric coating (paragraph [0023]), encompassing claims 77-82. Joshi et al. differs from the instant claims insofar as it does not disclose treating myocardial infarction.

It is *prima facie* obviousness to select a known material based on its suitability for its intended use. Also, established precedent holds that it is generally obvious to add known ingredients to known compositions with the expectation of obtaining their known function. MPEP 2144.07. Therefore, it would have been obvious to one of ordinary skill in the art to have used fumaric acid diethyl ester as the NF-kappaB inhibitor in the method of Pye et al. to treat myocardial infarction to achieve the known function of decreasing the amount of reperfusion injury motivated by the desire to use a compound known to be a NF-kappaB inhibitor as disclosed by Joshi et al.

Conclusion

No claim is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NANNETTE HOLLOMAN whose telephone number is (571) 270-5231. The examiner can normally be reached on Mon-Fri 800am-500pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frederick Krass can be reached on 571-272-0580. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
